Tell Your Story

"For most of my childhood, I was rather alone."

The children that went to my school found it entertaining to bully me, and it was rather insulting. They would pick on me for the oddest things, but I felt that I deserved it.

Dr. Jan's Corner

When I was growing up, I cried a lot and because of that now I hardly cry. Recently one of my friends died in a car wreck. I don't want to cry but I feel like I have to. Is this healthy, or is there another way to show my emotions?

In The News

Vaping Illnesses Linked to Vitamin E Oil

The U.S. Centers for Disease Control and Prevention (CDC) is focusing on vitamin E acetate as a "potential toxin of concern" in the recent outbreak of vaping-related injuries and illnesses in the United States. Vitamin E acetate, also known as vitamin E oil, is a common nutritional supplement that is found in many common products. It is safe when applied to your skin, but when it is heated and inhaled it turns into a thick, greasy substance that can coat your lungs. Health officials tested samples of fluid from the lungs of 29 patients with vaping illnesses and found vitamin E acetate in all 29 samples. However, officials say there may be additional ingredients or toxins that are making people sick. Nearly all of the 29 patients also said they had vaped products that contained THC (the ingredient in marijuana that gets people high).
